

Gulf Concrete Technology LLC (GCT) manufactures **Structural Concrete Insulated Panels (SCIPs)** to build concrete structures as an alternative to wood and concrete block construction. The SCIP concrete structures are disaster-resistant constructions that ensure sustainability and resilience.

They redefine energy-efficient construction with thermal mass insulation and a high R-value which is ideal for industrial, residential and commercial projects. We also distribute mortar application machinery and relevant mortars.

PAST PERFORMANCE

Federal Projects	Federal Bureau of Investigation (FBI) Building	Ponce, PR
	U.S. Fish & Wildlife Services Warehouse & Storage Facilities	Vieques, PR
Municipal Projects	Arroyo Waterfront Park	Arroyo, PR
	Sewer & Water Board of New Orleans Buildings	New Orleans, LA
Commercial Projects	Church's Chicken	Bayamón, PR
	Ford Dealer Showroom	Hatillo, PR
	Data Communications Center	Shreveport, LA
	Chili's Grill & Bar	Aguadilla, PR
	Restaurant (LBHR) Building	Long Beach, MS
Residential Projects	Avery Island Residence	Iberia Parish, LA
	Private Residence	Coral Gables, FL
	Private Residence	Port Aransas, TX

COMPANY SNAPSHOT

Manufacturing Plant : 4739 West Oreck Road Long Beach, MS 39560

Ownership Status: Small Business Company

UEI: RZ1KNCHJTPL1

Cage Code: 6D6S3

Sam Register: Active Primary

Primary NAICS Code*:

*There is currently no specific NAICS code for SCIP building systems.

327390 Manufacturing Products

Secondary NAICS Code:

444190 - New Building Materials

326140 - Manufacturing Polystyrene Foam Products

236210 - Industrial Building Construction

327999 - Concrete, Dry Mixture Manufacturing

DIFFERENTIATORS

Earthquake Resistant

Hurricane / Wind Resistant

Structural Capacity

Fire Resistant

Sustainability and Energy Savings

Level 3-A Ballistic Proof

Quicker construction

Reduces Carbon Footprint

Contributes to LEED Points

Cost Effective

Soundproof

Termite Resistant
